The Daily Bottleneck

- **Tedious Repetition:** Manually purging every model you open
- **Wasted Processing Time:** doing the same process 3+ times
- **Human Error:** Manually purging every model will lead to some being missed

The VDC Workflow

1. Dynamo Player

add a shortcut for it so it
fires easily in the future

2. Run the script

simply click on the play
button

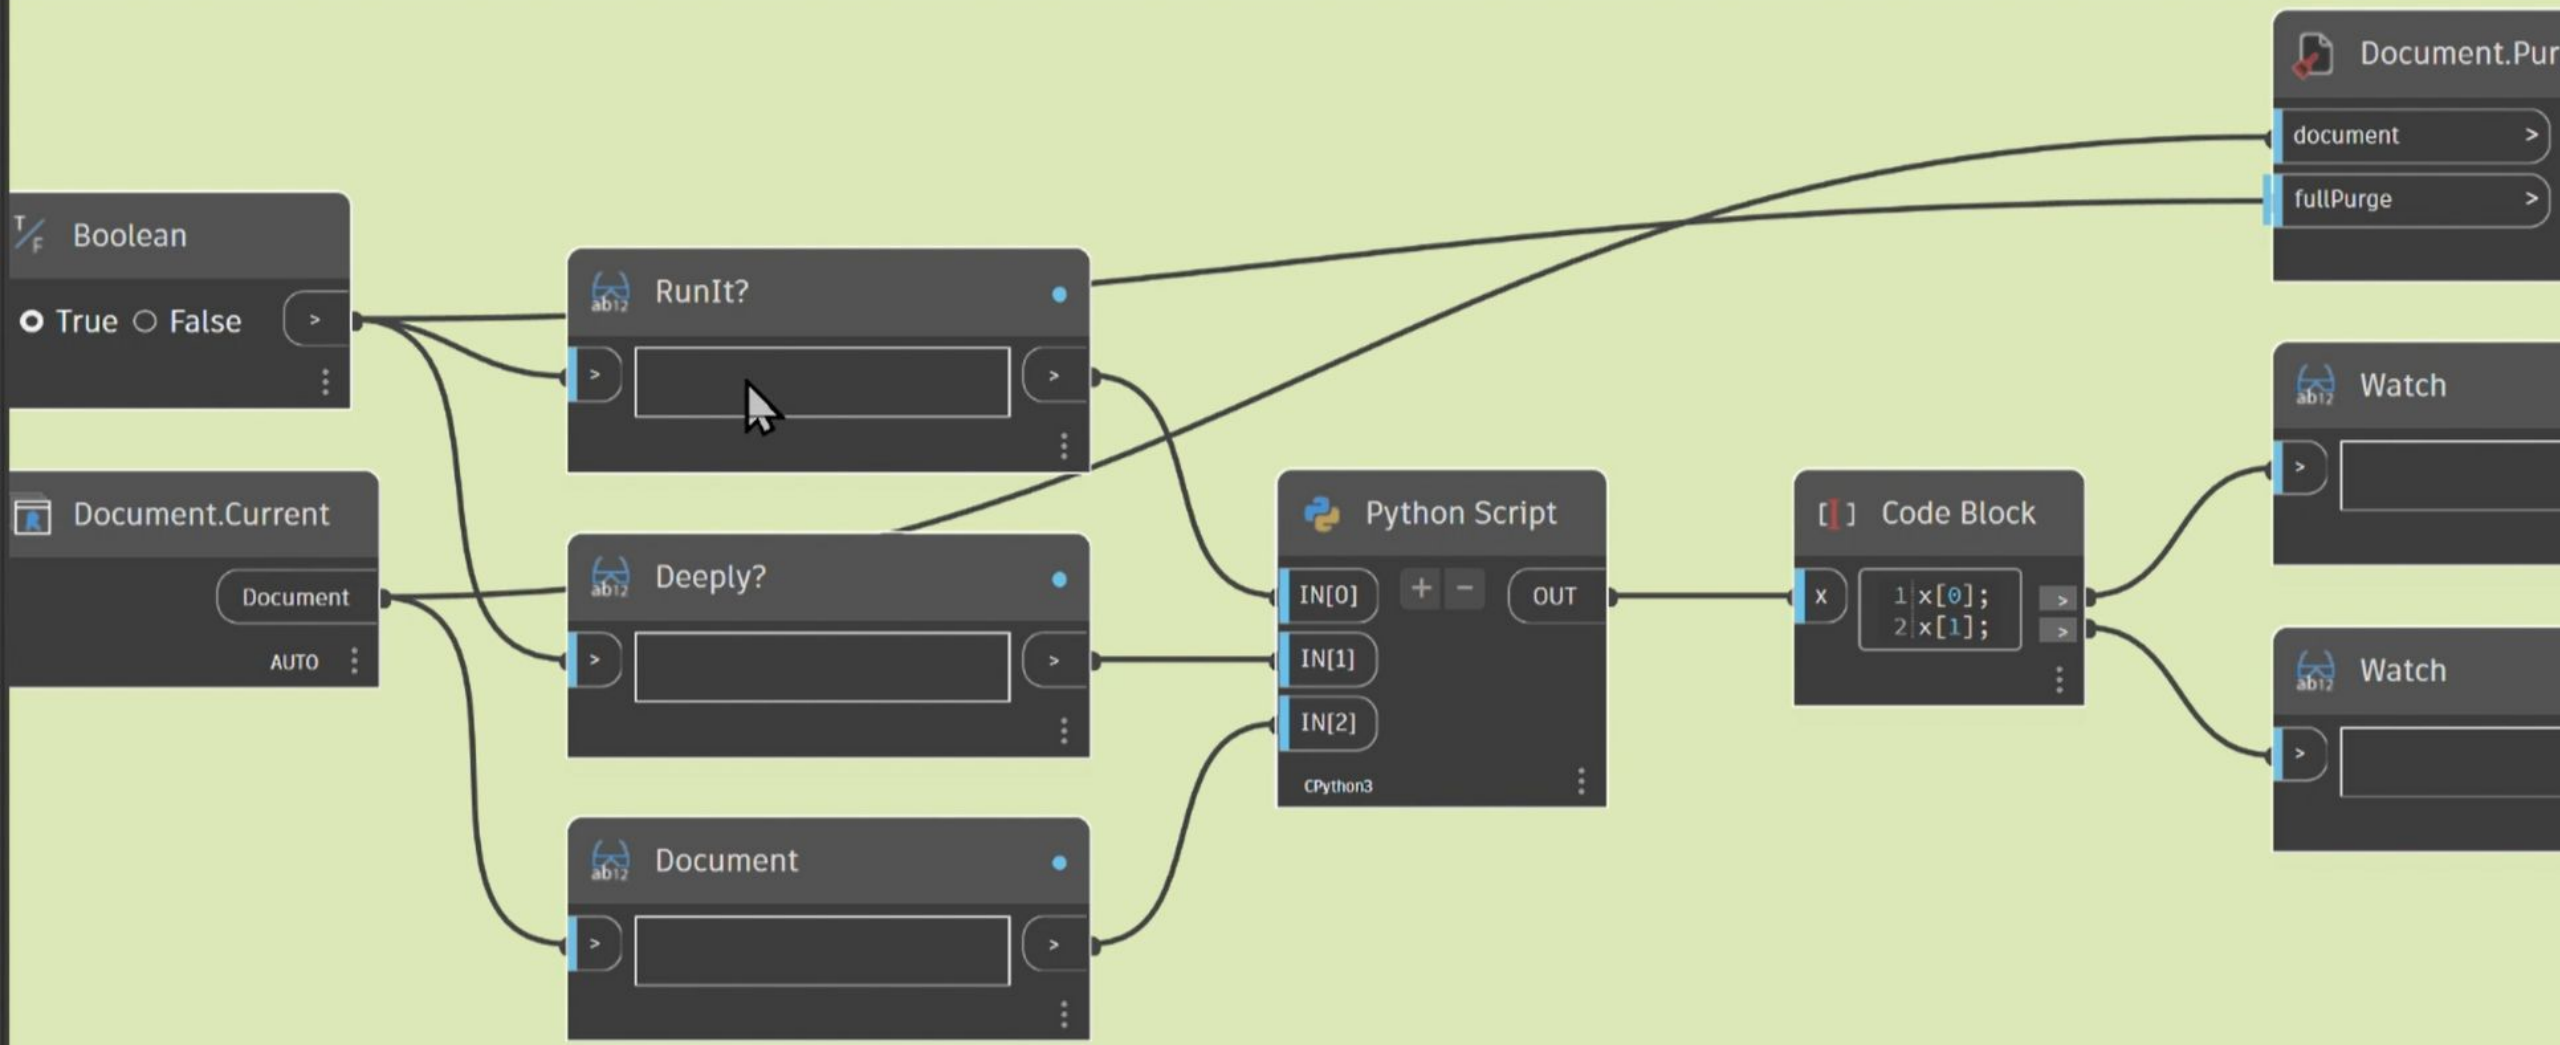

3. Check the result

check atleast one revit
model

Deep-purge for model health & file size.

Automated Model Optimization

Coordination **Impact**

99%

Less client complaint about non-purged models

Focus on Coordination, Not Repetitive Tasks

by simply hitting this run button in the dynamo player
you do not have to worry about how long it will take
to purge or how many times
