

BIM && YOU | EP.07: CAD Is Loaded... But WHERE?!

Find, log, and auto-open every sheet hiding CAD Links or CAD Imports in one click.

EXECUTION ENVIRONMENT

Revit + Dynamo Player

Scope: Links + Imports on Sheets

STEP 01 The Problem

MANUAL BOTTLENECK

"Loaded" — But Where?!

Manage Links = Blind

Shows DWG links as Loaded, but hides which sheets host them.

Untraceable CAD Imports

Health Report = Count Only

Flags total imported DWGs with zero sheet location data.

Manual Sheet Hunting

100+ Sheets Pre-Issue

Opening sheets one-by-one wastes hours before submission deadlines.

STEP 02 The Inputs

WHAT YOU FEED IT

INPUT 01

Category

Target Sheets

Sheets (OST_Sheets)

Scans deliverable sheets directly
— skips working views.

INPUT 02

Filter Rule

Sheet Scope

Drawn By = "AB"

Audits all sheets or isolates
specific author sets.

INPUT 03

File Path

Report Target

Sheet_Audit_Log.txt

Text file path to record flagged
sheet names.

STEP 03 The Core Logic

4-STAGE DYNAMO PIPELINE

01

Get Sheets

FilterByBoolMask

Collects project sheets
matching the target filter.

02

Find DWGs

ImportInstance

Detects both CAD Links
and CAD Imports on
sheets.

03

Flag Hits

HasCAD = true

Filters list down to
sheets containing active
DWGs.

04

EXECUTE

Log & Open

WriteText +
OpenView

Writes report and opens
flagged sheets in Revit
UI.

STEP 04 The Result

1-CLICK PAYOFF

Instant Sheet Audit Log

Timestamp + SheetName

Exports an exact list of every sheet containing CAD files.

Auto-Opened Sheets in UI

Views Tiled on Screen

Opens every offending sheet immediately for fast DWG cleanup.

5-Second Pre-Issue QA/QC

Dynamo Player Ready

Eliminates manual sheet checking before project submissions.

Can not find your CADs?

The image shows a screenshot of the Revit software interface. On the left, the 'Project Browser' shows a hierarchy of sheets, including 'E101 - Electrical Power River Diagram', 'E201 - MECHANICAL', 'E301 - North Level 1 - Lighting Plan', 'E601 - Panel Schedules', 'M100 - MECHANICAL LEGEND', 'M601 - Duct Sections', and 'M701 - Mechanical Schedules'. The main area displays a table of CAD links:

Link Name	Status	Positions Not Saved
CAD LINK 1.dwg	Loaded	8
CAD LINK 2.dwg	Loaded	3

Below the table, the text 'Where?!' is written in large red font. At the bottom of the table, there are buttons for 'Save Positions', 'Reload From...', 'Reload', 'Unload', 'Insert', 'Add...', and 'Remove'. A checkbox labeled 'Preserve graphic overrides' is also visible. On the right side of the interface, a search panel is open, showing a search bar and a list of results, including 'EP.07 Who Left CAD Imports on Submission Sheets!'. The bottom of the image features the text 'but you don't know the location of it and' in bold black font.

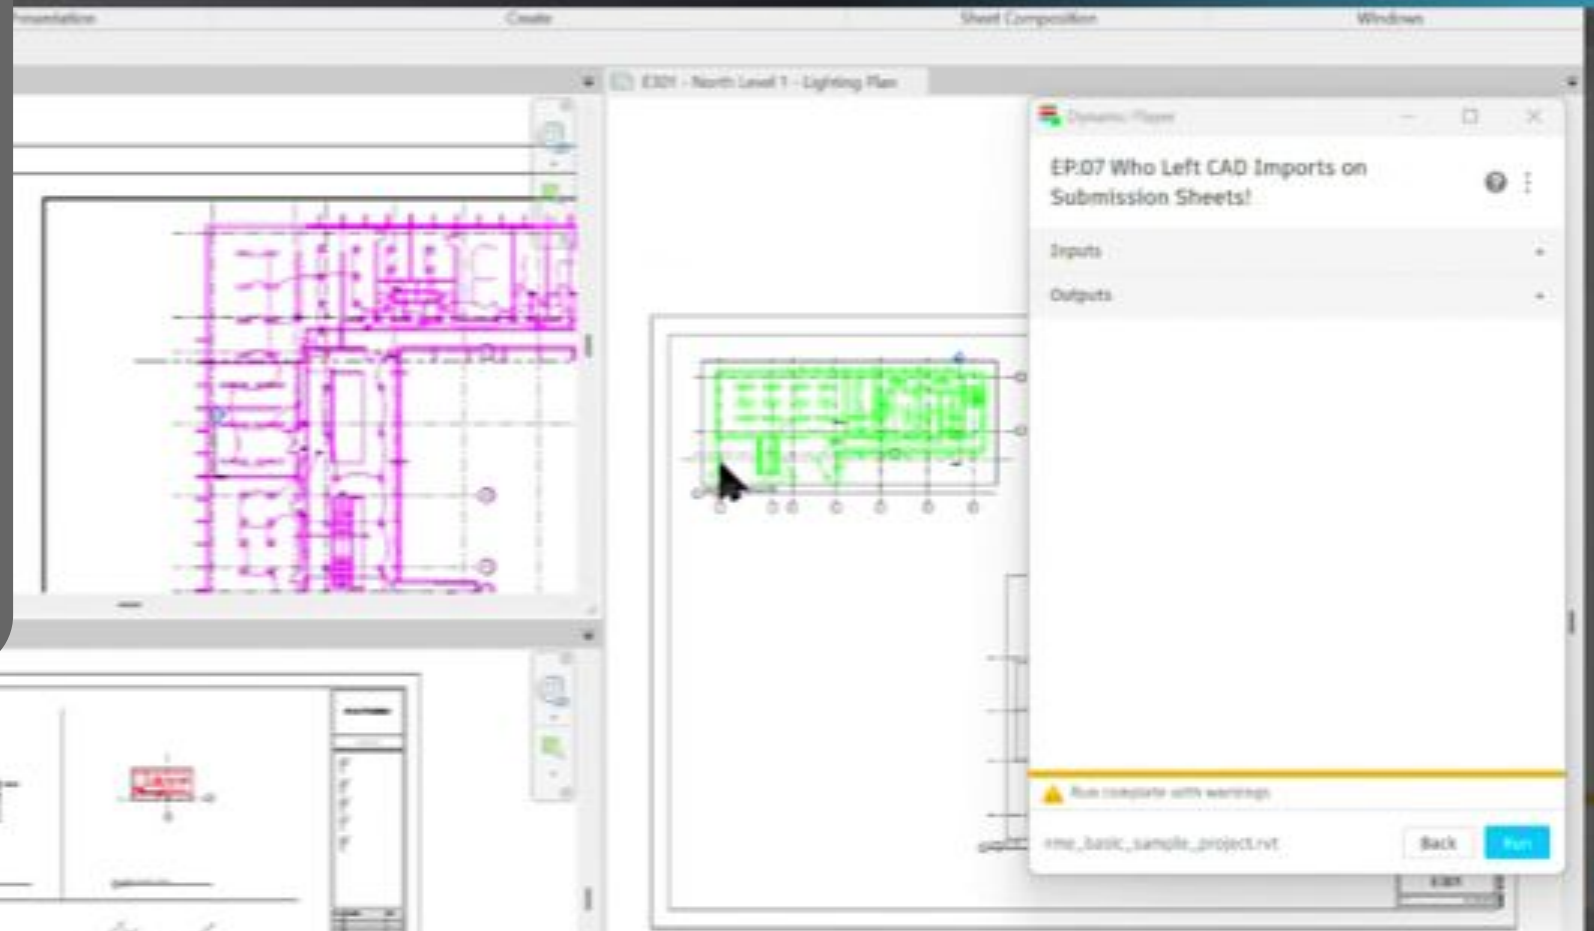

The background image shows a screenshot of a Revit Dynamo workflow. On the left, a pink box contains a sequence of nodes. This connects to a larger green box in the center, which contains a more complex arrangement of nodes, including a 'Run Python Script' node. To the right of the green box is another green box with more nodes. On the far right, a 'Dynamo Player' window is open, showing a file explorer view. The 'Choose Folder' field is set to 'EP07 Who Left CAD Imports o...'. The search results list 'EP07 Who Left CAD Imports on Submission Sheets!' with a play button icon next to it.

Input:
1-Your sheet parameter
2-Location of Report you want

output:
**1-TXT Report of
the Sheets**

**2-Open all the
sheets with CADs**

CAD links for CAD imports inside of it.
